<i>Under Kyoto Protocol Article 3.7</i>	
CO ₂ (Emissions) (see footnote 4)	0.20
Total (Emissions) (see footnote 5)	0.21

1. One Mt equals one Tg, which is equal to 10¹² g (1,000,000,000,000 g) or one million tonnes
2. The base year is the sum of 1990 totals for CO₂, CH₄ and N₂O and 1995 totals for HFC, PFC and SF₆
3. Net Emissions are reported in the Common Reporting Format
4. Under Article 3.7 of the Kyoto Protocol the UK must include emissions due to deforestation in its base year gross emissions. For CO₂ these emissions (0.20 MtC) are a subset of all LUCF emissions (4.8 MtC) in the base year. The deforestation emissions cannot be derived from other values in this table and is entered here for information.
5. Includes additional non-CO₂ emissions due to deforestation.
